

Scribe 9000 Duplicator Series

Raising the Bar for Disc Duplicating

Durable, Reliable, Affordable

The Scribe 9000 Series is a feature rich disc duplicating & printing system. Easy to use, simple to set-up with snap-n-go printing options, the Scribe Series is an all new CD/DVD or BD production system.

Engineered to perfection, Scribe uses a 300 disc input which is three times greater than its closest competitor. The KVM PC built-in solution means each Scribe System is pre-configured which results in easy setup without error - simply connect Keyboard, Video and Mouse and begin duplicating & printing.

These advanced features make MF Digital an industry leader in Disc Duplication. From the moment you open the box to the last disc of the day, you can count on Scribe.

Let our duplicator do more for you; experience the future with MF Digital.

Printer Configurations

Inkjet	Full Color, 4800dpi, 16 million colors
Thermal	Scratch Proof, Water Proof, Ultra Fast
Retransfer	Photo Realistic, Better than Silk-Screen

Scribe 9000 Duplicator Series

Ready To Go!! PC Built-IN

Scribe 9000 offers more versatility & flexibility than any other desktop duplicator on the market. Based off the pre-configured, built-in PC, the Scribe simply needs a keyboard, video & mouse, then its ready to duplicate. This KVM approach allows MF Digital to offer unique solutions unparalleled in the industry.

Lights Out Production

The Scribe is surprisingly easy to operate with unlimited job queuing, detailed activity logs and database exporting ability. Rest easy knowing every job is submitted, recorded & processed with 100% accuracy – Truly lights out production.

Optional Network Client

Every Scribe comes with an option to download Windows XP network client software. Never before has it been this economical to centralize disc duplicating. Using advanced "spindle select" technology, both CD and DVD recordable media can be present - ready for any job sent from the network.

Verification Feature

MF Digital's Scribe verification feature provides the user with bit-for-bit verification, or comparison, of a disc to its master. Unlike checksums, bit-for-bit verify leaves no room for error. Copy jobs may be submitted with this option so all discs produced are 100% verified. Even Audio CDs can be fully verified, not just a disc's TOC. This ensures faithful "click" and "pop" free copies every time. Also, users can submit verify-only jobs, great for spot checking a batch of produced discs.

Printing for Any Occasion

MF Digital offers a variety of disc printing solutions fit for any need. For economical, full color printing we offer the PicoJet inkjet printer, for quick disc printing speed we offer the Prism thermal printer, and for photo realistic images which yield better resolution than silk-screen we offer the P55 dye-sublimation printer.

Scribe 9000 Series is Available in Three Model Configurations:
