

The PrintStation, by MF Digital

The PrintStation is designed to increase CD/DVD/BD printing throughput and substantially reduce disc printing costs.

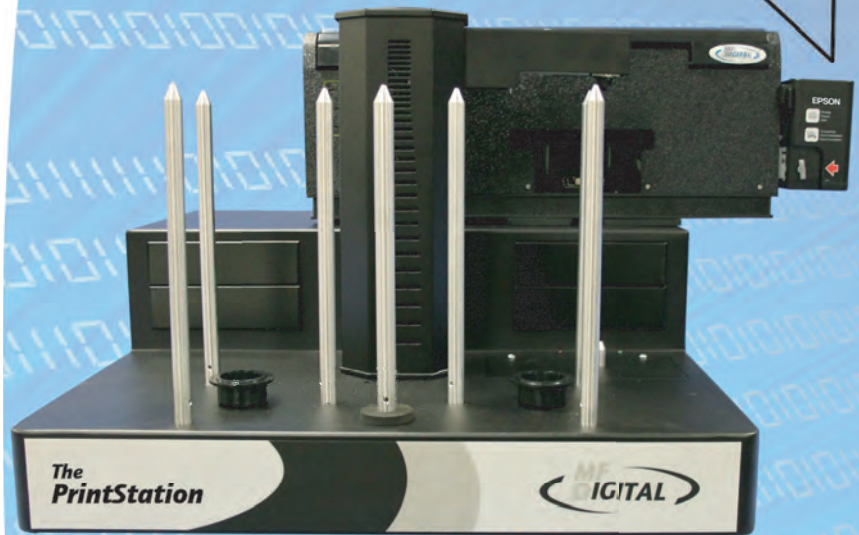

Engineered to perfection, The PrintStation combines the technology of the Epson L800 CIS printer, with the industry standard MF Digital autoloader device and software.

MF Digital's KVM Built-In PC technology pre-configures the system for instant production. Simply add your Keyboard, Video and Mouse and begin production immediately.

Unlike other CIS systems, The PrintStation offers original Epson® printer technology and genuine Epson ink supplies assuring the reliability and quality you deserve. All for only 5 cents per print!

Let The PrintStation do more for you; Experience MF Digital.

The PrintStation

EPSON

5¢
Per Print!

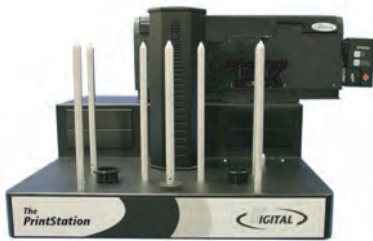

Advanced Print Features:

The PrintStation offers more versatility and flexibility than any other print station on the market. Design and print directly from the same screen. The PrintStation allows direct print from .std, .pdf and most other commercial graphic design software. You can use your .std files from Rimage*, Microboards* and Primera* by utilizing our .std conversion feature.

Special Print Functions:

The PrintStation is loaded with special print functions. Serialization, Bar Coding, and Circular Text are just a few of the advance functions available to you. You can add and place your own text and images anywhere on your design with unlimited design potential; crop, resize, move, and manipulate images (.jpg, .png, .tif, .bmp, .gif), text and objects. Design your own disc print templates (116 – 119mm). The possibilities are endless!
