

Live Event CD Recording

The affordable 5200 Series Live Event Recorder/Duplicator system from MF Digital advances the art of capturing and duplicating live audio for any event. Simple by design, easily produce custom audio CD's of any event right there on location in under 3 minutes.

Whether it's a Church event, seminar, court deposition, trade show or live concert the Live Series from MF Digital combines recording, editing and duplication in one powerful system. The 5200 series Live Event recorder is a "must have" for producing high quality audio copies from any analog source.

Designed in a space saving enclosure with two integrated CD/DVD drives, the 5200 Live Series is not only compact, but expandable. Easily connect 5204-EXP 4 drive expansion modules to increase production from 2 drives to six right up to 42 drives, controlling everything from a single console. Add an optional plug-in CD/DVD AutoPrinter to complete your production.

- Direct Recording
- Record over 650 hours
- Duplication
- Multiple disc spanning
- Advanced editing
- Edit Track markers
- Audio verification
- Insert audio
- Simplicity in operation
- Expandable
- Optionally add Printers

Ease of use is core to the design - by utilizing the Windows OS, EventCD provides a powerful, yet simple wizard driven software offering one-click duplicating, allowing even the most novice user to be an expert. Use the track ID edit tool for live editing, or span to multiple disc with one click. Even standardize your live audio CD with pre-recorded messages in WAV or MP3 which can be easily inserted. Unlike conventional systems, everything is committed to hard drive -and with space for up to 650 hours of uncompressed continuous recording, you capture every second.

EventCD grows with your needs, maximizes your production and streamlines your workflow. A cost effective, powerful solution from industry leaders MF Digital
