

Live Video Event Recording

Capture - Author - Burn - Duplicate
DVD's from any live event in minutes.

The affordable 5600 Series Live Video Event Recorder / Duplicator system from MF Digital advances the art of capturing and duplicating live video for any event. Simple by design, intuitive in use, easily produce custom DVD's of any event right there on location in just a few minutes.

Whether it's a Church event, seminar, court deposition, trade show or live concert the Live Series from MF Digital combines pre production, chapter editing, encoding software plus duplication in one powerful system. The 5600 series Live Event recorder is a "must have" for producing high quality DVD productions directly from a single live video feed.

Capture

Video input from firewire or optional SDI source

Author

Set up templates in advance for pre production including menus and chapters

Burn

Burn two copies immediately

Duplicate

Expand your system to up to 42 drives
