

Generating a PRN file for Spectrum 2 printer.

- 1) Open up a Spectrum 2 Designer software.
- 2) Create a design then you should save all projects as a Spectrum 2 designer file for future implementation. Go to **File => Save As...** type in a file name.

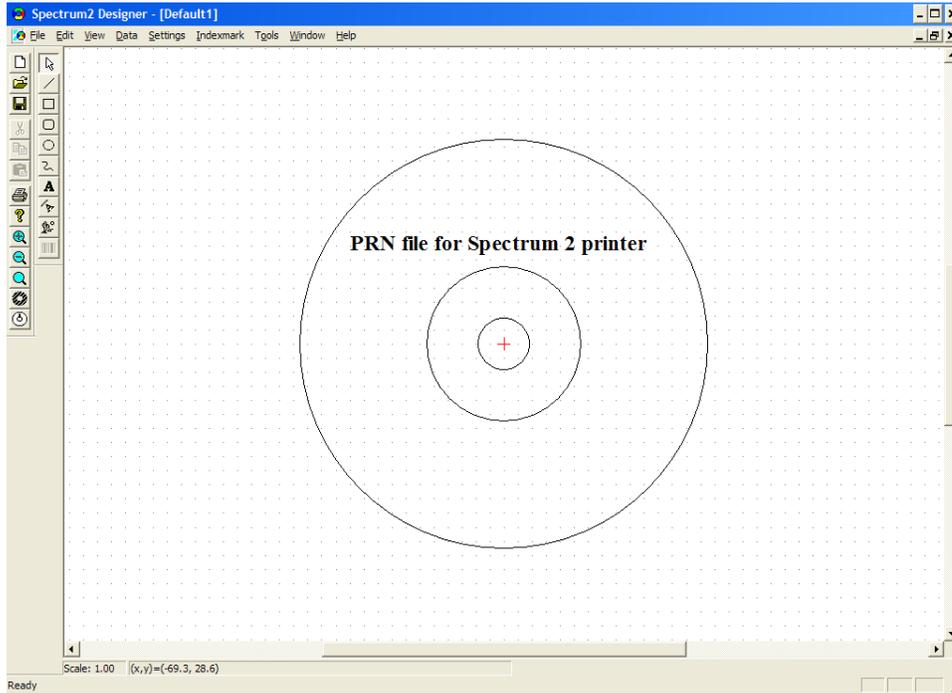

fig.1 Spectrum 2 Designer software.

- 3) To generate a PRN file go to **File => Print...**
- 4) Highlight a **Spectrum2** printer and then check the **Print to File** box then press **Print** button as shown on fig.2.

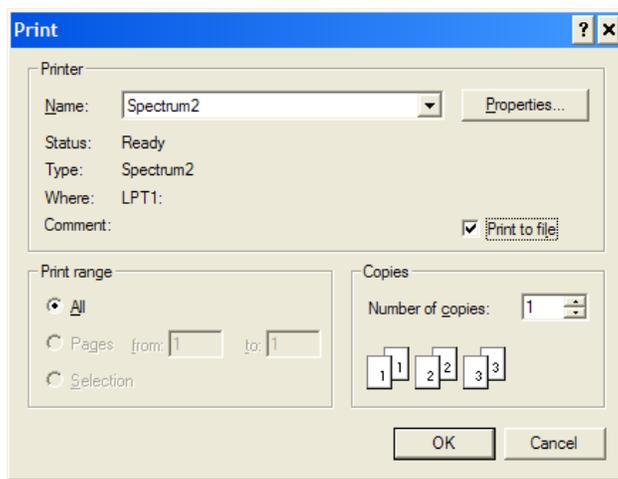

fig. 2 Check the Print to file box.

6) Type in a name for a PRN file. You can also specify the location of the PRN file to be saved in.

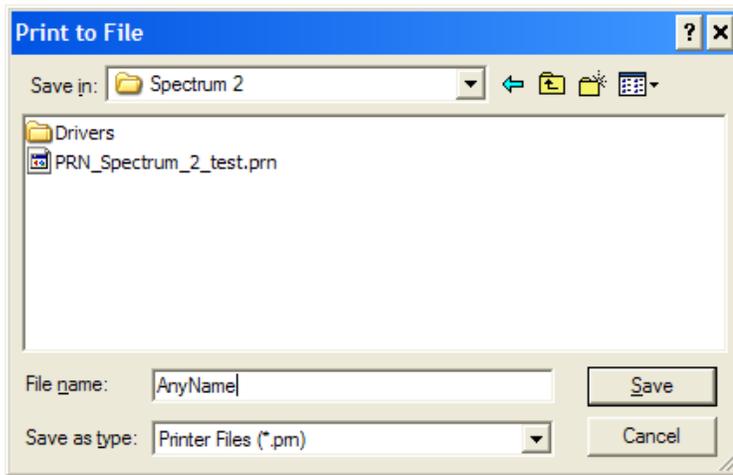

fig. 4 Naming and saving a PRN file.

NOTE:

You must use the “.PRN” extension to successfully generate a PRN file.

7) You have successfully generated a PRN file.
