SMARTDRIVE 48X™

Thank you for purchasing an MF DIGITAL CD duplicator. The unit you have purchased is equipped with the latest in CD-R technology – the 48X SmartDRIVE. This high-speed drive demands that quality CD-R media be used. The use of unapproved media may result in high fall out rates or discs with high errors. To ensure your CD-R copier performs as designed, use only 48X MF DIGITAL approved CD recordable media. For your convenience, we have attached a list of all approved media for the use of 48X recording speed.

## Approved Media List
